Kaliningrad

Russia

Dear student,

This brochure will provide you with an overview of the courses taught in foreign languages on a regular basis at IKBFU.

Most degree programmes at IKBFU are offered in the Russian language. To attend courses in Russian you need to master at least B2 proficiency level. Some courses are taught in English, German, Polish and French.

If you have decided to come to Kaliningrad and study at our University as an exchange student, you will be enrolled at one of our Institutes. We recommend choosing the specialty you are majoring in at your Home University. While most of the courses in your learning agreement should be from the chosen Institute, you have an opportunity to choose any of the offered courses from other Institutes as well.

If you do not speak Russian, it is still possible to study with us. In this case we suggest you to take a preparatory course of Basic Russian at IKBFU for everyday situations before a semester starts.

We would be happy to answer all your questions!

Best regards,

Division for International Programmes
